

Harness creation and enrich your student's learning through...

Magnolia Plantation and Garden's Youth Education Program

Age appropriate learning based on South Carolina standards curriculum.

Bring your students to learn in our campground setting, complete with enclosed shelters and nature at our fingertips. Magnolia's full Youth Program is approximately two hours long and includes three rotational learning centers and one field study:

- ♦ Water Ecology Center - learn about the different water systems in South Carolina
- ♦ Botany Center - focus on azaleas
- ♦ Contributions of the Enslaved Africans Center
- ♦ Field Study/Audubon Swamp Garden

Nature at its best!

Audubon Swamp Garden

All three centers are led in a small group setting with meaningful interactive hands-on activities that will help the information come alive for your students.

The self-guided Field Study includes admission to our Audubon Swamp Garden. America's oldest gardens welcome you to explore them upon completion of the centers.
